

## Care for Your Precious Plant

If you had a precious plant,  
whether a flower, vine, tree, or crop,  
and you very much wanted it to reach its maximum health and fruitfulness,  
what would you do?  
How would you care for it?

It's true that only God can make it grow (1 Corinthians 3:6-9).  
But you are His fellow worker.  
What could you do to help your plant  
reach its full potential?

- You would give it the right amount of nourishment.
- You would give it the right amount of water.
- You would place it so that it gets the proper amount of light.
- You would repeatedly, diligently remove anything that fruitlessly saps the life of the plant.  
You would  
weed it or  
prune it.
- You would make sure the plant remains connected to its source.  
A disconnected branch or  
an uprooted flower  
will quickly wither and die.

Your relationship with God is a living thing.  
Nourish it.  
Keep it exposed to the Light.  
Remove anything that hinders it.  
Make sure it stays connected to its Source.  
Keep it healthy!  
Keep it growing!

Hymn: [Everything I Need](#)
